#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

REMOVAL
Remove rock shaft housing and both axle assemblies from tractor (Section 30, Group 20).
Remove transmission oil cup and rear oil line.
If tractor is equipped with a differential lock, lock assembly must be removed to service differential.
Remove pet screw securing differential lock pedal to shaft on left side of transmission case. Drive pedal forward of end of shaft. Remove key from shaft.
Hold differential lock yoke in place and drive shaft out toward rear of tractor. Remove plug from rear of transmission and Woodruff key from under yoke as shaft is driven out.
Note O-ring packing on shaft. Replace if damaged.
Remove cockshill top control gear from transmission as instructed in Section 73, Group 20.
CAUTION: Be sure to observe all safe practices when removing or installing the differential. Use a hoist wherever possible.
Lift up on differential assembly to relieve weight on bearing shells.
Remove bearing shells with shims from transmission case, keeping shims with their respective quills for correct assembly.
Refer to Chapter 1 of Fundamentals of Service, FCS Manual 40 for a complete explanation of gear train adjustment.
