#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Pedigree Worksheet KEY KEY KEY KEY KEY KEY

Interpreting a Human Pedigree
Use the pedigree below to answer 1-5

1. In a pedigree, a square represents a male. If it is darkened he has hemophilia; if clear, he has normal blood clotting.
a. How many males have hemophilia? **2**
b. How many males have hemophilia? **2**

2. A circle represents a female. If it is darkened, she has hemophilia; if open she is normal.
a. How many females are there? **7**
b. How many females have hemophilia? **2**

3. A marriage is indicated by a horizontal line connecting a circle to a square.
a. How many marriages are there? **3**

4. A line perpendicular to a marriage line indicates the offspring. If the line ends with either a circle or a square, the couple had only one child. However, if the line is connected to another horizontal line, then several children were produced, each indicated by a short vertical line connected to the horizontal line. The first child born appears to the left and the last born to the right.
a. How many children did the first couple (couple in row I) have? **2**
b. How many children did the third couple (couple in row II) have? **7**

5. Level I represent the first generation, level II represents the second generation.
a. How many generations are there? **4**
b. How many members are there in the fourth generation? **7**

Use the pedigree below to answer 6-12
Shaded individuals have Huntington's Disease

Individuals are numbered for each generation right to left...they are denoted with their generation and their number. See #7 for example.

6. Write the generation on the pedigree numbers (roman numerals).
7. Which members of the family above are affected with Huntington's Disease? **I-1, II-2, II-3, II-7, III-2**
8. There are no carriers for Huntington's Disease; you either have it or you don't.
With this in mind, is Huntington's disease caused by a dominant or recessive trait? **dominant**
9. How many children did individuals I-1 and I-2 have? **4**
