The fourth edition of the publication "World production and consumption of ceramic tiles" produced by the Anisac Research Department is due to be released in November. Considering 200 pages of graphs, tables and commentary, it provides detailed analysis of the sector trends up to 2015 in industry markets, per capita consumption and export flows in large geographic regions and in the 70 largest tile producers, consumers, exporter and importer countries.

1. Ceramic tile world production and consumption volumes remained substantially stable in 2014 with respect to 2013 (+0.1% and +0.2%, respectively). Import export flows rose by just 1.5%, continuing the slowdown observed in 2014 (1.1%) against the previous year.

2. World tile production fell by 0.1% with respect to 2014 to 12,355 million sq.m. Output remained stable or saw slight growth in all areas of the world with the exception of Asia, where production dropped for the first time from 6.702 to 6.637 million sq.m. since 2010, although still accounting for 49.8% of global production. This downturn was driven by significant falls in India, Indonesia and China, which failed to be compensated by growth in Viet

3. The 2015 is slated characterized by a one percentage rise bills in 2014 del volume di produzione globale del mondo, tenuto conto dell'andamento osservato nel 2014 (+1.1%) rispetto all'anno precedente, con un aumento del 1.5% rispetto al 2013 (+0.1%) anche i flussi di importazioni, con un lieve incremento del 1.5% nel 2014 (+1.1%) rispetto al periodo precedente.

4. La produzione mondiale di piastrelle si è tenuta a 12,355 milioni mq., 0.1% in più rispetto al 2014 (+0.2%), anche i flussi di importazioni, con un lieve incremento del 1.5% nel 2014 (+1.1%) rispetto al periodo precedente.
